

**Grigore Albeanu, *Neutrosophic Computational Models - II***

**Abstract**

This paper continues to describe neutrosophic computational models based on distances and similarity measures. Both single value and interval neutrosophic sets are considered. The usage of a software library in implementing future projects is proposed.

**Keywords:** neutrosophic sets, single valued neutrosophic sets, interval neutrosophic sets, Hausdorff-Pompeiu distance, similarity measures

**ACM/AMS Classification:** Primary 68T99; Secondary 03H99
